

Fort Belvoir, South Post Communications Equipment Node

Submitted by the Department of the Army

Web Posting
Preliminary and Final

Commission meeting date: November 6, 2014

NCPC review authority: Advisory

Applicant request: Approval of Preliminary and Final

Delegated / consent / open / executive session: Delegated

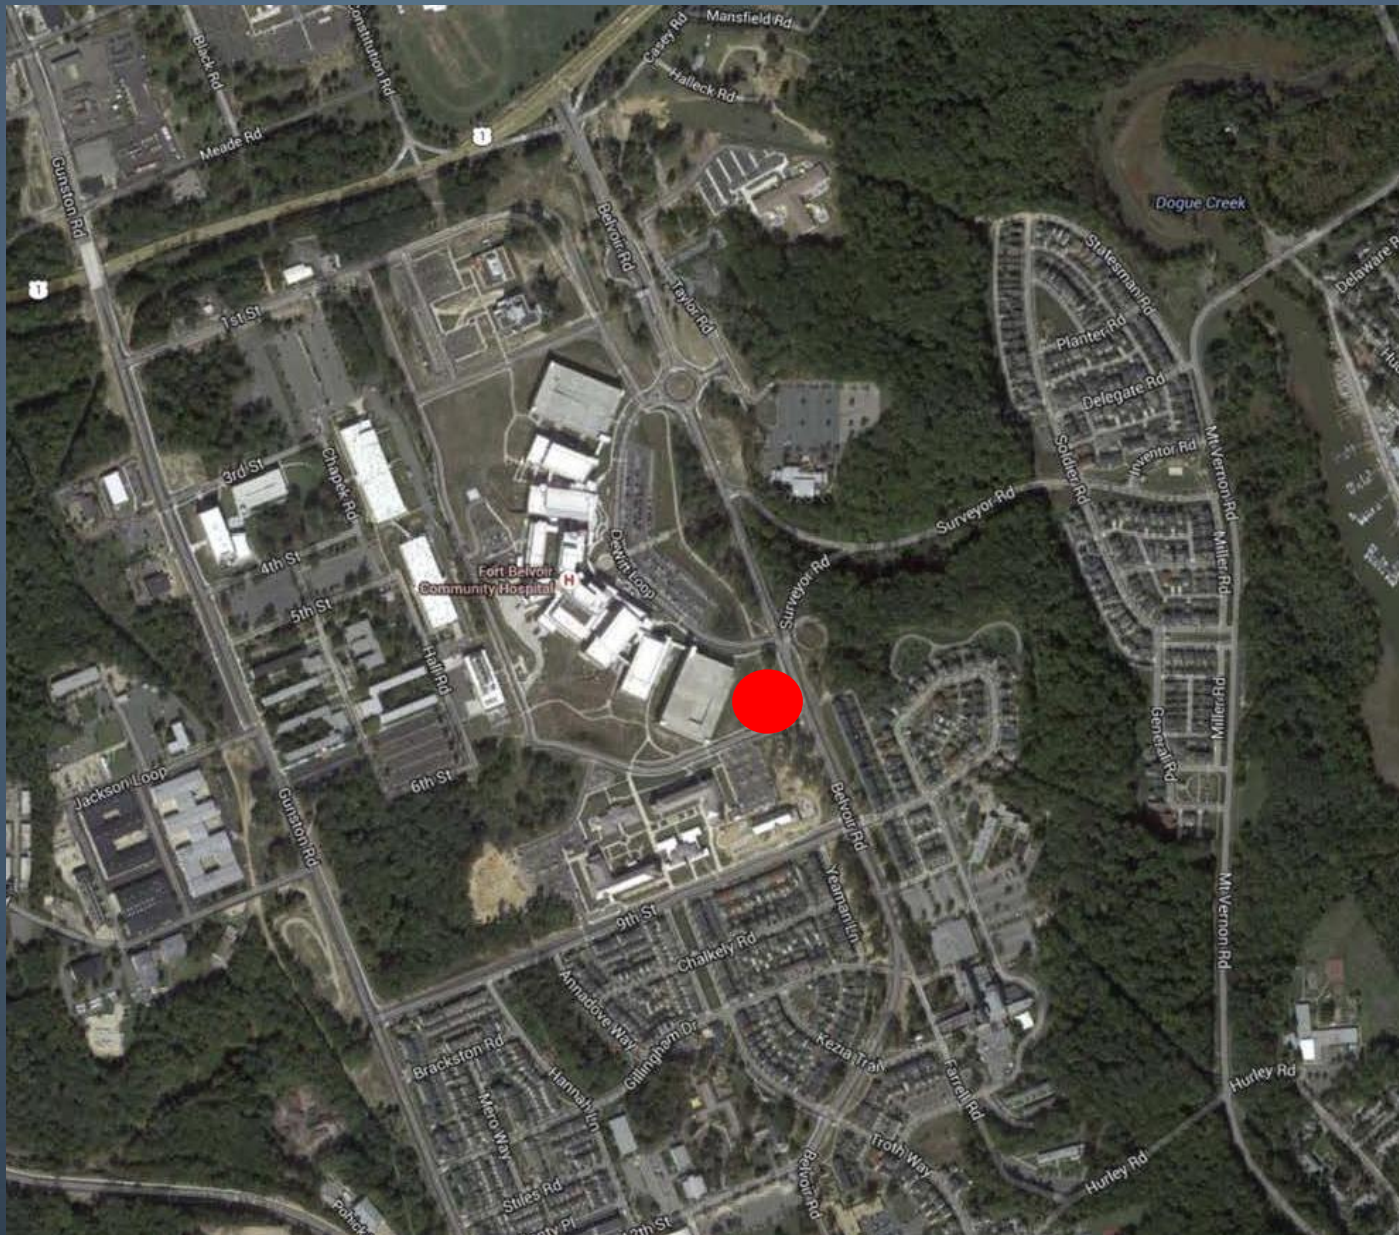

NCPC Review Officer: C. Kelly

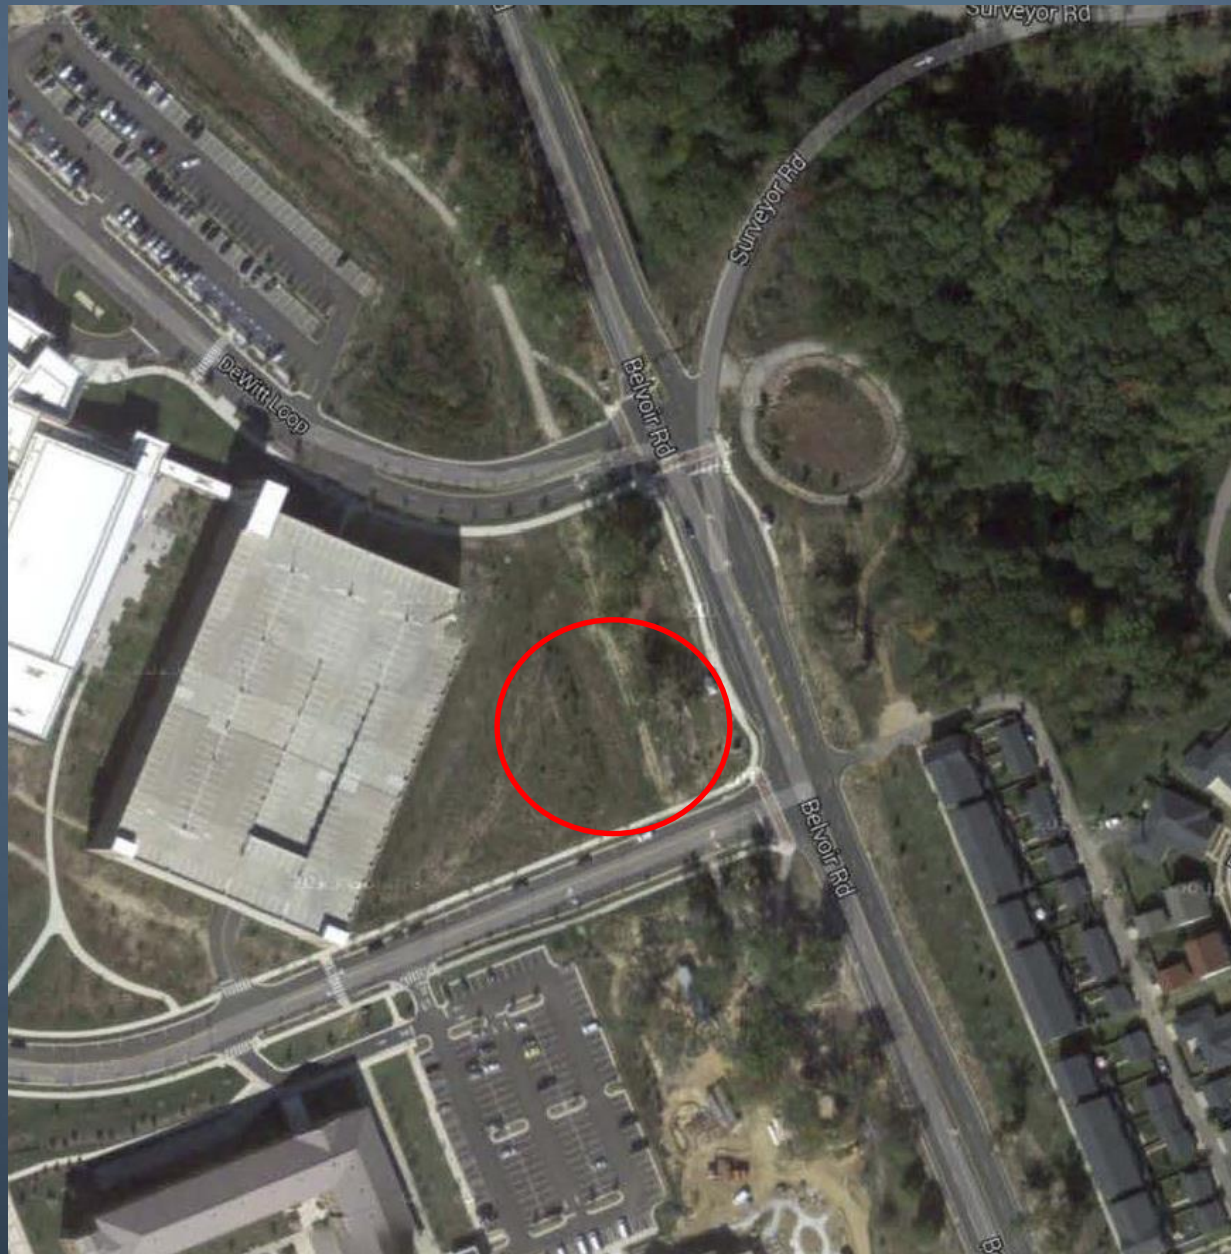

NCPC File number: 7620

Project summary:

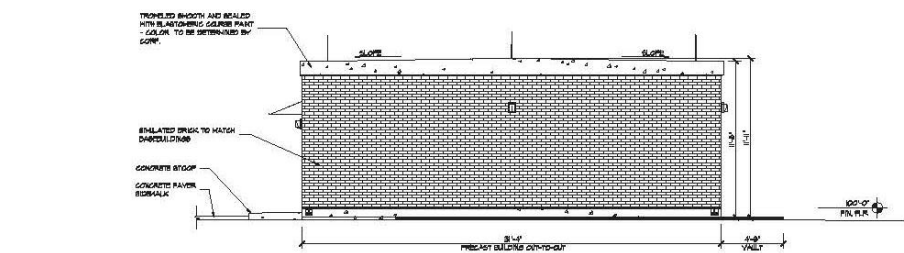

The Department of the Army has submitted preliminary and final site and building plans for a communications node at the intersection of 6th Street and Belvoir Road on the south post of Fort Belvoir. The proposed communication node would replace an existing facility located in the basement of the old Dewitt Hospital Building, which is scheduled for demolition.

The project would construct a new communications node facility that provides voice and data services. The facility will be approximately 1,293 square feet building with a 850 square foot mechanical gravel yard and fence. The building will be constructed with concrete stamped while the enclosure of the yard will be constructed of CMU.
